

Net Zero Energy by Design: Large Scale Commercial

For the Customers looking to have the smallest possible carbon foot print and lowest cost energy.

Efficiency as high as 200K BTU/\$. 1/5th the production of CO₂ of natural gas

Featuring:

- Frictionless Magnetic Bearing Compressor
- Advanced Borehole Geo-Exchange
- Active Energy Recovery and Energy Recycling
- Hybrid Thermal Solar or CHP

Let's look at your project and see what we can save!
